REPORT OF THE WATER DEPARTMENT

For the Year 1965

During the year 114,037,320 gallons of water were pumped. This shows an increase of 8,455,958 gallons more than in 1964. Of the total amount pumped 16,576,125 gallons were used for industrial and commercial.

3,268 feet of service pipe were used for the installation of 51 new services. About 500 feet of ten inch water main have been installed on the Cemetery Road off New Zealand Road. The stand-pipe on New Zealand Hill was cleaned and painted.

The Telemetering System voted last year is still in the process of being installed. Some work has been done on it, but due to the lack of materials it may not be complete for some time.

Work on the test well investigation shows about fifty test pipes driven in the West end of town. Only three are capable of producing any amounts of quality water, and are still subject to approval by the State Dept. of Public Health before they may be developed.

Respectfully submitted,

Douglas H. Perkins
Foreman

REPORT OF THE HIGHWAY AGENT

The following work was done on the Town roads during the past year: 1,000 feet of Folly Mill Road were hot-topped; 2,900 feet of South Main Street were hot-topped; 1,000 feet of Washington Street between South Main Street and Route 86 were hot-topped; 10,000 feet Beach roads tarred; 1,300 feet of drainage installed on South Main Street and Worthley Ave.; roads were patched where needed and brush at the sides of the roads was mowed; 1,700 feet were cleared, graded and gravelled for Cemetery Road.

I suggest more hot-topping of Town roads to cut down on maintenance costs.

Respectfully submitted,

William E. Felch
Road Agent

AUDIT PROCEDURE

The accounts and records of all town officials charged with the custody, receipt and disbursement of public funds were examined and audited. Vouchers and cancelled checks were compared with supporting invoices and pay-rolls as well as entries in the books of record. Receipts were checked by source insofar as possible and totals of receipts and expenditures verified. Book balances were verified by comparison with reconciled bank balances made up from statements obtained from depository banks. Verification of uncollected taxes was made by mailing notices to delinquent taxpayers as indicated by the Collector's records. The amounts of uncollected and unredeemed taxes as indicated in this report are therefore subject to any changes which may be necessitated by the return of verification notices.
